

ActiveInsight

MEASURE YOUR CYBER SECURITY PROGRAM

Are you prepared to handle a data breach? With Delta Risk's collective advisory and assessment services – also known as ActiveInsight – we can identify the potential gaps and vulnerabilities in your cyber security program, put your incident response teams to the test through simulated exercise scenarios, and educate your staff (and keep them trained) on the steps and skills they need to respond to emerging threats.

Evaluate and Test Your Cyber Security Defenses

Our seasoned experts and former Fortune 500 CISOs provide comprehensive assessments, exercises (discussion-based and fully-operational), and training to evaluate your organization's cyber security posture and overall preparedness in the face of an attack. To fully test your cyber defenses, we employ web application testing, vulnerability scanning, traditional penetration testing, and advanced red-teaming methodologies.

Simulate Live Fire Attacks and Respond to the Latest Threats

We offer many different types of cyber exercises, ranging from discussion-based table-top exercises and management-level exercises to full-scale operational exercises with simulated attacks. These real-time simulations can be tailored to the types of threats your organization faces every day. We'll help your workforce stay prepared to respond to incidents by evaluating your current defenses and testing new procedures.

Comprehensive Assessment Reporting

Final assessment reports provide extensive insight into strengths, accomplishments, and opportunities for improvement, and focus on client-specific pain points.

Custom Approach

Each company's customer requirements and goals are unique, which is why we offer tailored training courses and exercises to meet all needs, and assessments fit for specific frameworks.

Our Security Experts

All our assessments, exercises, and training programs are designed by security experts who combine their knowledge with leading-edge tools and capabilities.

What

- Compliance and Best Practices Review
- Security Program Maturity Review
- Compliance and Best Practices Review
- Tabletop and Full-Scale Exercises
- Remote and On-demand Training
- Compliance and Best Practices Review

Who

- Cyber Security Engineers
- Experienced Pen Testers
- Security Analysts
- Senior Consultants

Why

- Verify Incident Response Preparedness
- Reenact Real-World Threats
- Identify Security Gaps and Weaknesses
- Test Technology, People, and Processes

Benefits of ActiveInsight

- ▶ Detect incidents faster and respond quicker
- ▶ Reduce the overall impact and cost of attacks
- ▶ Improve cyber security awareness across lines of business
- ▶ Augment the technical prowess of your security staff
- ▶ Fortify your network and perimeter security
- ▶ Support ongoing compliance initiatives

About Delta Risk LLC

Delta Risk LLC provides tailored, high-impact cyber security and risk management services to government and private sector clients worldwide. Formed in 2007, Delta Risk consists of trusted professionals with expert knowledge around technical security, policy and governance, and infrastructure protection to help clients improve their cyber security operational capability and protect business operations. Delta Risk is a Chertoff Group company.
