

Insider Threat Services

ASSESS AND PREVENT INSIDER THREATS

Insider threats are complex and constantly evolving adversaries. Whether malicious or unintentional, they threaten what matters most – your people and data. Delta Risk LLC knows people are your most effective defense against insider threats if properly trained and supported.

Since 2007, Delta Risk has solved complex cyber problems for commercial and government clients. Our team understands the insider threat mentality. All our experts hold certificates in insider threat assessments. We carefully calculate and investigate insider threats' intentions and where they could emerge.

INSIDER THREAT SERVICES

Training

We offer training for insider threat user awareness and insider threat program leaders.

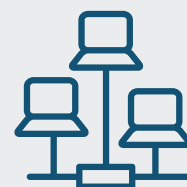

Program Creation

Our goal is to create a program that fits your organization and provides actionable information. Delta Risk LLC's approach establishes processes first and automation second.

Vulnerability Assessments

We work with you to locate and remediate existing vulnerabilities in processes and technology that insider threats may exploit. We also aim to discover unknown exfiltration channels and overly permissive accounts that could grant a malicious insider the keys to the kingdom.

Take Advantage of Existing Technology

You don't have to have the latest technology to combat insider threats. We can use your existing technology to gain access to your environment and piece together the events of an insider threat breach.

Asset Protection

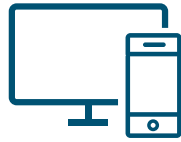

Our approach focuses on safeguarding your mission-critical assets from insider threats no matter where those assets are located.

GSA Awarded IT-70 Contract

The GSA recently recognized Delta Risk's cyber expertise by awarding an IT-70 contract, #GS35F482GA and all four Cyber Special Item Numbers (SINs).

What

- ▶ Online-Based Training with Real-World Application
- ▶ Host Security Controls and Policies
- ▶ Servers and Critical Systems
- ▶ Organizational Policies and Processes
- ▶ Planned Response Actions

Who

- ▶ Experienced Penetration Testers
- ▶ Expert on Insider Threats
- ▶ Social Engineering Masters
- ▶ Cyber Security Engineers

Why

- ▶ Validate Existing Security Controls
- ▶ Identify Unknown Exfiltration Paths
- ▶ Identify Overly-Permissive Systems and Accounts
- ▶ Validate Detection and Response Capabilities
- ▶ Reduce Leading Drivers for Malicious Insiders

Is an Insider Threat Program Right for You?

- ▶ You want a viable program, not just a paper-based program
- ▶ You need assurances your security controls are working as designed
- ▶ You acquire or merge with another organization and want to know how they could impact you
- ▶ You need to demonstrate compliance with government and industry regulation

Service Features

- ▶ Discovery of Critical Assets
- ▶ Customized Phishing Campaigns
- ▶ Measure Ability to Mitigate Data Exfiltration
- ▶ Actionable Remediation Recommendations
- ▶ Support for Compliance Reporting
- ▶ Identify Systems Insider Threats May Use
- ▶ Updated Policies with Insider Threat
- ▶ Focused Evidence of Response Action
- ▶ Trusted Performance
- ▶ Role-Based Training for Team Members
- ▶ Leverages Technology You Already Have Trusted
- ▶ Avenue for Anonymous Reporting
