

DELTA RISK

Corporate Overview

Our Approach

Delta Risk is a leader in cyber security services for commercial and government clients worldwide. We offer a full complement of strategic consulting, advisory, incident response, and managed security capabilities, including cloud security solutions. Your approach to cyber security should be planned, managed, and executed based on your organization's needs. Our team will help you succeed in today's competitive business environment by building on the people, processes, and technology you already have. Delta Risk can help you develop resiliency with approaches specific to your organization that encompass policy setting, contingency planning, technical training, threat awareness, assessments, and exercises.

Advisory Services

ActiveInsight provides advisory services to prepare your organization to withstand security challenges through four areas: Exercise, Training, Assess, and Advise.

Managed Security

ActiveEye combines the latest technology with trained, experienced, US-based analysts to secure your systems and data inside and outside the organization, including cloud environments.

Response Services

ActiveResponse provides experts and tools to detect, contain, and eliminate attackers on your network through three distinct offerings: Hunt, Coach, and Team.

Our History

Established in 2007, Delta Risk is led by cyber security experts with knowledge in cyber policy, infrastructure protection, technical security, cloud security, and governance. Our cadre of former military warfare operators came together to help clients improve their cyber security operational capability and protect their business operations.

TCG Diamond Holdings, an affiliate of The Chertoff Group, acquired Delta Risk in 2015. Since then, The Chertoff Group has partnered with the company to foster its ongoing investment in people, innovative solutions, as well as the acquisition of Allied InfoSecurity.

Delta Risk was recognized as one of the "Top 10 Managed Security Service Providers 2016 and 2017" by Enterprise Security magazine, and as one of the "Top 25 Cyber Security Companies 2017" by CIO Applications magazine. Delta Risk was also named a top 50 Managed Security Service Provider by MSSP Alert in 2017.

Our People

We specialize in tactical approaches for cyber defense and risk assessment. Each of our technical consultants, analysts, and engineers are dedicated subject matter experts. They have hands-on experience working at Fortune 500 security firms and cyber defense operations.

We are in business to help our clients achieve their critical cyber security goals, whether that means delivering hands-on training, consultative and advisory services, or diving into network testing battlegrounds. We value our people as individuals, as problem solvers, and as the exemplars of the Delta Risk core principles.

Our Cyber Security DNA

- ▶ Planners for National Livewire, Cyber Storm, and Dark Screen exercises
- ▶ Authored DHS' "Methods for Advanced Cyber Exercises"
- ▶ Created DNS continuity exercises for ICANN
- ▶ Fielded core team for 2012 DHS National Level Exercise (NLE)
- ▶ Developed training curriculum taught in 140 countries and six regions
- ▶ Developed cyber exercise programs for Fortune 50 companies
- ▶ Created organic red team capability and built an incident management program for world's largest oil and gas company

GSA IT-70

U.S. General Services Administration (GSA) recently recognized Delta Risk's cyber expertise by awarding an IT-70 contract, #GS35F482GA and all four Cyber Special Item Numbers (SINs).

Our Approach

There is no single security solution that answers all needs. We take an agile and data-driven approach when it comes to designing our solutions to respond to changing requirements. Our approach involves co-discovery and joint problem-solving with clients and partners to find the optimal response for the most unique challenges.

Delta Risk incorporates methods from the national security arena to evaluate and improve cyber operational readiness in the private sector.
